Main symptom:

- Fever
- Headache
- Facial Pain/Tenderness

Diseases (Match Levels):

- Sinusitis (likely bacterial): Moderate match
- Tension Headache: Low match

- Migraine: Very low match

Relevant diseases advice:

****Sinusitis (likely bacterial) (Moderate match)****

- Pre-hospital care recommendations:
 - Use warm compresses on the face.
 - Inhale steam to relieve congestion.
- Symptoms to watch out for:
 - High fever.
 - Severe facial pain.
 - Vision changes.
 - Stiff neck.
- Self-care:
 - Stay hydrated.
 - Get enough rest.

****Tension Headache (Low match)****

- Self-care:
 - Manage stress with relaxation techniques.
 - Maintain good posture.

****Migraine (Very low match)****

- Self-care:
 - Identify and avoid potential triggers.
 - Rest in a dark, quiet room.

****Medication Suggestions:****

- Paracetamol (500mg every 6 hours as needed for fever/pain)
- Decongestant nasal spray (short-term use only, if congestion develops later)

Urgency: Moderate

Consult a doctor for proper diagnosis and treatment. If symptoms worsen significantly, seek immediate medical attention.
